# Online Business English Courses

## Why Our Clients Choose Us

### Tailor-Made Training for Your Company

Customized to your specific business profile, we provide language training focused on the tasks of specific positions, which can be put into practice immediately. The training program is tailored to the company, the group and the personal needs of the student.

### Native Language Teachers

Native language teaching gives you the experience and confidence to succeed in any international environment. Our classes are taught 100% in English, and our teachers do not merely teach textbook templates, but rather the real language used in everyday business.

### Experiential Education

Real-life situations are practiced in groups with a limit of 4 students. This, along with the interactive lessons, ensures that all students are actively involved and receive plenty of teacher interaction. Our principle is that students speak at least 70% of the time.

### Good Return on Investment

Our methodology has proven many times to deliver long-term returns for our clients. We successfully prepare clients for international projects to ensure their presentations deliver powerful impact. The outcome of negotiations is driven by confident language and argumentation skills.

# Soft Skills Training in English

- In addition to the training topic, we also fine-tune the English skills of our clients.
- We work with experienced, expert trainers with excellent English language skills.
- The topics of our training seminars are fully tailored to the individual needs of the company.
- Training courses can be held in English only, or can start with the basics in Hungarian followed by practicing the skills in English.

## Our Topics:

Negotiation Techniques

Presentations

Intercultural Communication

Leadership Development

Customer Service and Complaints

Project Management

# Teambuilding in English

- In the excitement of the game, participants don't even realize that they have been speaking English the whole time.
- The activity leaders adapt perfectly to the language skills of the participants.
- Online or in-person activities.
- For teams of 2-200 members.

**Develops Communication Skills.**

**Increases Confidence in Speaking English.**

**Creates Team Bonding.**

## Our Story

I am [Judit Kátai](#) and I have been teaching Business English since 2017.

I started as a teacher and then started focusing more and more on education management and business development. Between 2009 and 2017, I lived in London, where I supported the market entry of numerous Hungarian companies into the UK as a Country Manager and Business Consultant. It was in this environment that I got to know the specifics of English business life and typical communication techniques, and where I first saw the contrast between a general business English course and the language skills needed in a real-life situation.

I am convinced that effective and smooth communication is a crucial element in achieving business success. That's where the EnglishHUB team can help - so that the lack of language skills doesn't get in the way of progress.

## Our Mission

is to prepare our trainees to be able to communicate confidently in English in any business setting, even in a native English-speaking environment.

Feedback from our clients shows that they are satisfied with our work. They quickly overcome their inhibitions about speaking and enjoy communicating in English during their time with us.

Many have also reported positive feedback from foreign contacts.

## Help After Hours

We provide English language opportunities between classes as well.

In the [EnglishHUB - Business English Community Space](#) Facebook group, we organize free meetups in Budapest, where we talk only in English. You can sign up for these meetups through our Facebook group.

**For effective *and* enjoyable English training and team building please feel free to contact us!**
